# Arrest'R

## **PREVENT ROOF STAINING FOR 2 PLUS YEARS!**

Apply Arrest'R to create a breathable barrier between the roof's contaminant to prevent staining for 2 + years.

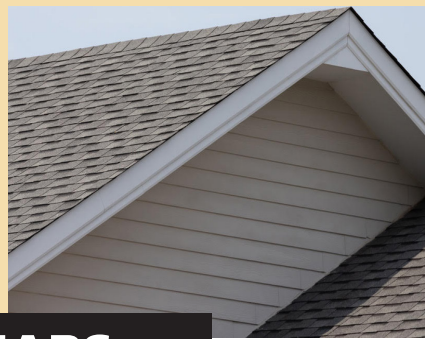

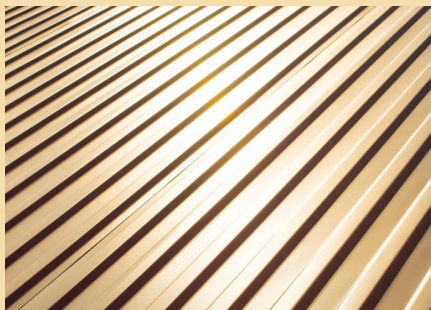

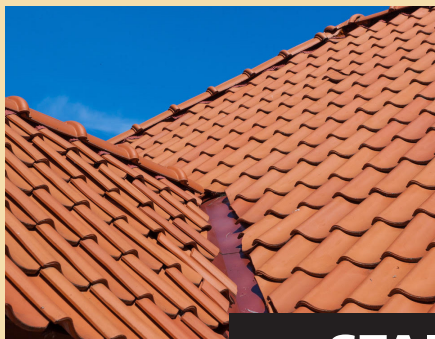

Arrest'R is a 5% copper sulfate pentahydrate liquid formulated with Stabitol™, a proprietary penetrant and solubilizing agent. The unique ionization of Stabitol solubilizes/liquefies the micron sized copper sulfate particles to a nanosized molecule making them capable of flowing deeply into porous substrates.

ARREST'R™ can be applied to clay or concrete roof tiles, asphalt, fiberglass, wood-composite or wood shingles. It can also be applied to many hardscape materials such as concrete, pavers, brick, and stone surfaces, cement driveways and sidewalks.
